Strip of wood on under side locked
to carmon with strips of rattan
over.

Collection E. E. Ayer

Notes

Acc. 1000

Price

Brony camera. 121 cm. long. - palm wood
wrapping of split bamboo.

The Moro possess many such weapons, part of which they manufacture themselves. The gun carriages are usually very rude or entirely lacking, and the guns are of short range. To make up for the many imperfections of the weapon, it is filled with projectiles and the fire is held until the enemy is very near. In this way it is easy to take aim and no shots are wasted.
