Two logs a & b are placed one above the other and held in place by two poles 1 & 2 at one end and by d and a tree at the other.

An arched piece of wood x is placed in the notch in 1 and to one end is attached a loop 4. To the lower end is fastened a cord which is attached to the stick c. This stick c rests on the ground at one end and the end is attached to line is raise 8 or 10 inches. A log 3 with its lower end between d & the tree & its upper between 1 & 2 is held up in air by loop 4. Stones & logs are put on end of 3 so when released it falls on logs a & b with force. Weight on c pulls cord at x causing it to slip & 3 to fall. Put in new wrap.
