Indiana Dunes National Park: Miller Woods

Paul H. Douglas Center for Environmental Education
100 North Lake Street, Gary, IN 46403
(219) 395-1882

Things to Do & Amenities

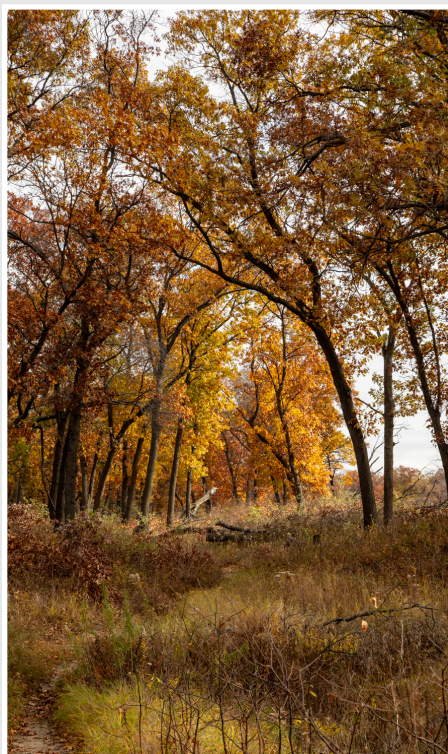

Paul H. Douglas Trail	Pollinator Trail
Hiking & Walking	Snowshoeing
Birding Hotspot	Nature Preserve
Wheelchair-accessible	Year-round Ranger Programs

To ensure that everyone has the chance to discover the beauty of this globally rare dune and swale habitat, please stay on established trails and leave the plants and flowers where you discovered them.

For a list of programs, maps, and visitor information, please download the NPS app or scan the QR code.

1 Blue Lupine (*Lupinus perennis*) and Black Oak (*Quercus velutina*)

2 Black Oak Savanna (*Quercus velutina*)

Explore the biodiverse 1000-acre Miller Woods in all seasons as you traverse the trails through globally rare dune and swale landscape, black oak savannas, sand dunes, the Calumet Lagoon and Lake Michigan. With hands-on exhibits, native ambassador animals and ranger-led programs at the Paul H. Douglas Center, as well as a nature play area, there is something for everyone.

This guide takes you through the seasons at Miller Woods, pausing to explore some of the plants, fungi and animals that make this preserve unique. Please remember to stay on the trails to protect this unique and fragile ecosystem.

3 Blazing Star (*Liatris aspera*)

Late Summer to Fall in the Dunes

With an abundance of late-flowering plants, you are sure to still find plenty of colors and pollinators utilizing this rare habitat. As fall progresses, the temperatures cool and the black oak leaves will turn red, making this a great time to hit the trails.

Winter in the Dunes

A great time to hit the trails at Indiana Dunes National Park is in winter. The Paul H. Douglas Center offers cross-country ski and snowshoe rentals, and hosts family-friendly guided hikes. Visiting now is a great way to see the dune and swale topography.
