Double comb of macana points
ends tipped with feathers

Collection

U.S. Columbian Com. with
Retro & Perzans over

Where Placed

Notes

Series 4 Plate J.

Acc. 13

J. page 102

exh. 1918

Combs are made of points of palm wood held bound between two pieces of cane with cane splints. At dances they are worn with feather decorations at either end. Very similar objects are found in Northwestern Brazil and western Venezuela.
