Probably Mausi

Locality

Br. Guiana

Name

Narrow waven band with
short black feathers inserted.

Collection

J. J. Zuelch. (Com. Br. Guiana
(over) N. C. E.

Where Placed

Hall 16

Notes

Part of crown piece

Acc. 14

exh. 1918

This specimen is the lower band of black feathers for the adjacent crown headdresses and shows well the method of manufacture of these. The feathers are those of the curassow bird inserted in a band of woven cotton.
