Name Piece of ~~forest~~ ivory (presumably mammoth)  
used as ornament on desk, sawed off & polished  
on lower side, partly coated with brown lacquer.  
According to Mr. E. S. Riggs, who made a micro-  
scopic examination, "a broken & overgrown walrus  
tusk. Diseased condition has resulted in a gnarled  
Collection Capt. Marshall Field Expedition to China, 1923.

pathologic growth."
