

180412

ENT

Country Brazil
 Locality Tapajós River (South Amazon basin)
 People Paritintin (? Tupi) Stock
 Name

Pan-pipes made of ^(?) palm of exceedingly simple & very unusual type - there are only 4 reeds closed at one end & crudely bound together by a piece of bark of fibre-bound only at one end so that the reeds easily fall apart one reed - cracked & bound again

Collection Goteborg Museum Exchange

(Baron Erland Nordenskiöld, Coll.)

Notes by bark fabric - the smallest reed is badly split probably during shipment.

Acc. 1706

Width 3 Length 21 cm ^(of longest reed) Height Price
